Q3. A lot of times people are busy and are not always able to vote. In November 2020, there will be an election for President and other offices and issues. I know it's a long way off, but how likely are you to vote in that election: Will you definitely vote, probably vote, are the chances 50-50, will you probably not vote, or will you definitely not vote?

Q15. In March 2020, California voters will be asked to authorize \$15 billion in general obligation bonds for school and college facilities, including \$9 billion for preschool and K-12 schools, \$4 billion for universities, and \$2 billion for community colleges. Would you strongly support, somewhat support, somewhat oppose, or strongly oppose investing in school and college facilities, funded by bonds?

Q15. In March 2020, California voters will be asked to authorize \$15 billion in general obligation bonds for school and college facilities, including \$9 billion for preschool and K-12 schools, \$4 billion for universities, and \$2 billion for community colleges. Would you strongly support, somewhat support, somewhat oppose, or strongly oppose investing in school and college facilities, funded by bonds?

Q16. In November 2020, California voters may be asked to vote on a measure to change the state's property tax law, often called Proposition 13. Under this proposal, property taxes for businesses would be recalculated each year to reflect the current estimated property value or fair market value instead of being calculated on the purchase price as they are now. Property taxes for homeowners would continue to be calculated on the purchase price. It is estimated the proposal will generate as much as \$11 billion in new revenue, which would be allocated toward state and local government, including at least 40 percent dedicated to public schools.

Q16. In November 2020, California voters may be asked to vote on a measure to change the state's property tax law, often called Proposition 13. Under this proposal, property taxes for businesses would be recalculated each year to reflect the current estimated property value or fair market value instead of being calculated on the purchase price as they are now. Property taxes for homeowners would continue to be calculated on the purchase price. It is estimated the proposal will generate as much as \$11 billion in new revenue, which would be allocated toward state and local government, including at least 40 percent dedicated to public schools.

Q20. Which of these statements do you agree with most?

1. _Expanding opportunities and improving services for children aged 0-5 is not as important as other priorities for state spending.

OR

2. _The state should rely on parents, churches, and the private sector to expand opportunities and improve services for children aged 0-5, instead of spending public funds.

Base: Those that disagree that California should increase spending on pre-school programs for children ages 0 - 5

Q24. As you may know, Governor Gavin Newsom recently signed a law that makes it easier for local school boards to turn down petitions for new charter schools if they would hamper the finances of the local school district. This law may reduce the number of new charter schools in California. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose this law?

Q25. As you may know, Governor Gavin Newsom recently signed a law that makes it easier for local school boards to turn down petitions for new charter schools if they would hamper the finances of the local school district. This law may help to protect struggling school districts from losing students to charter schools. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose this law?

Q26. In California, schools and school districts can utilize any textbooks they like. While the state recommends textbooks that the California Department of Education has determined are high quality, many schools adopt other textbooks or no textbooks at all. Which of the following statements is closest to your view about textbooks in California schools?

1. _The state of California should require all schools and school districts to adopt only textbooks the state has determined are high quality.

OR

2. _The state of California should encourage schools and school districts to adopt high quality textbooks, but they should not require them to do so.

OR

3. _Schools and districts should be free to adopt whatever textbooks they want and the state of California should have no role in these decisions.

Q27. Recent surveys show that more than 90% of teachers get lesson materials and ideas from the Internet at least once a week. Which of the following statements is closest to your view about teachers' use of materials from the Internet?

1. Schools and school districts should require teachers to use curriculum materials that they have reviewed and approved and prohibit them from gathering materials from the internet.

OR

2. Schools and school districts should not prohibit teachers from using materials from the Internet but should help teachers who use Internet resources to choose high-quality curriculum materials.

OR

3. Teachers should have control over what materials they use. Schools and school districts should neither encourage nor require teachers to use any particular materials.

Research shows that students of color are more likely to graduate high school and attend college when they have teachers of color. California State Superintendent of Public Instruction Tony Thumond has made it a policy priority to increase the number of teachers of color in California.

Q39. Do you think increasing the number of teachers of color in California is very important, somewhat Important, not too important, or not at all important?

There is a proposal under consideration in California that would require students to complete an ethnic studies course in order to graduate high school. According to the Los Angeles Unified School District, ethnic studies courses "operate from the consideration that race and racism have been, and continue to be, profoundly powerful social and cultural forces in American society. These courses focus on the experiences of African Americans, Asian Americans, Chicanas/os and Latinas/os, Native Americans, and other racialized peoples in the US."

Q40. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose requiring California students to complete an ethnic studies course in order to graduate high school?

According to the Los Angeles Unified School District, ethnic studies courses "operate from the consideration that race and racism have been, and continue to be, profoundly powerful social and cultural forces in American society. These courses focus on the experiences of African Americans, Asian Americans, Chicanas/os and Latinas/os, Native Americans, and other racialized peoples in the US."

Q40. Do you strongly support, somewhat support, somewhat oppose, or strongly oppose requiring California students to complete an ethnic studies course in order to graduate high school?

In the United States today, white and Asian students score higher on average on math and reading tests than do black and latino students. Economists have argued that investing in closing these achievement gaps in the US will help improve our country's economic health and global competitiveness.

Q42. In thinking about the many important issues facing our country, how would you rate closing the racial achievement gap in education? Do you think that it is a top priority, a high priority, a medium priority, a low priority, or that it is not a priority?

In the United States today, white and Asian students score higher on average on math and reading tests than do black and Latino students. Economists have argued that investing in closing these achievement gaps in the US will help improve our country's economic health and global competitiveness.

Q42. In thinking about the many important issues facing our country, how would you rate closing the racial achievement gap in education? Do you think that it is a top priority, a high priority, a medium priority, a low priority, or that it is not a priority?
