THOUGHTS ON CURRENT POLICY ISSUES

54. Here is a summary of a measure that will appear on the ballot in California this November:

REQUIRES ADDITIONAL AMOUNT OF GENERAL FUND SPENDING ON ARTS EDUCATION IN K-12 PUBLIC SCHOOLS. *Provides additional funding for arts and music education in all K-12 public schools (including charter schools) by annually allocating from state General Fund an amount equaling 1% of required state and local funding for public schools. Allocates greater proportion of the funds to schools serving more economically disadvantaged students. Schools with 500 or more students must spend at least 80% of funding to employ teachers and remainder on training, supplies, and education partnerships. Requires audits and limits administrative costs to 1% of funding.*

55. **(SPLIT A)** As you may know, in some school districts across the state, student enrollment has dropped more than 20%. Schools are funded based on student enrollment and attendance, so when the number of students decreases, the amount of funding decreases as well.

In some of these districts, leaders have said that under-enrolled schools should be shut down to help keep districts within their budgets, but communities want the schools to stay open in their neighborhood.

Having read this, which of the following approaches is closest to your own view? **(ROTATE)**

(SHUT DOWN) Under-enrolled schools should be shut down and children should be sent to other nearby schools so districts can stay within their budgets	44%

56. **(SPLIT B)** As you may know, in some school districts across the state, student enrollment has dropped more than 20%. Schools are funded based on student enrollment and attendance, so when the number of students decreases, the amount of funding decreases as well.

In some of these districts, leaders have said that under-enrolled schools should be shut down to help keep districts within their budgets, but communities want the schools to stay open in their neighborhood. Existing evidence shows that, historically, school closures have disproportionately been in predominantly Black, Latino and underinvested neighborhoods.
