## CALIFORNIA ROARS BACK

Governor Newsom's \$100 Billion California Comeback Plan

### NEWSOM'S PLAN TO TRANSFORM PUBLIC SCHOOLS INTO GATEWAYS OF OPPORTUNITY

- Universal Pre-K by 2024 and Savings Accounts for 3.7 Million Kids
- Highest Level of State School Funding in California History
- \$20 Billion to Reimagine Public Schools and Reduce Class Sizes

California's recovery is underway. But we can't be satisfied with just going back to the way things were. The Comeback Plan outlines comprehensive strategies and major investments to address the state's most stubborn challenges. Under Governor Newsom's \$100 billion plan, California will roar back from the pandemic.

It's time to reimagine our public schools. The California Comeback Plan proposes the highest level of state school funding in California history. It includes \$15 billion for targeted investments to reimagine our K-12 public schools, \$2 billion for savings accounts for 3.7 million kids and \$3.4 billion for universal pre-k.

COVID-19 presented a crisis without precedent this century, especially for school communities throughout California and the nation. Against the backdrop of emerging and evolving science, school leaders, teachers and staff worked tirelessly to implement both high-quality distance learning and safe reopenings for in-person instruction. For students and families, the crisis placed incredible strain on working parents and harmed the social-emotional and academic well-being of students—especially those historically mistreated or neglected by public institutions. Now, it's time to reopen our schools, full time in the fall.

As we reopen, we must center our education, health and social systems on meeting the needs of children holistically. We must invest early and pave a path from cradle to career. And we must build robust supports, particularly for our neediest students, so every child can thrive, regardless of their race or zip code.

## 12th Grade Math

An updated look at high school math course-taking in California

Sherrie Reed, Cassandra Merritt, and Michal Kurlaender

Academic preparation for postsecondary schooling is largely a function of high school and relevant high school curricula, including mathematics. Yet not all students have equal access to the courses that best prepare them for college. This infographic updates prior research<sup>1</sup> with an additional year of course-taking data and descriptive analyses by exploring the math courses that students take in 12th grade and the performance of students in 12th-grade math courses. The data presented here contribute to the evidence about troubling disparities in access to advanced math courses and help inform efforts to increase and diversify high school math course-taking.

### Policy Context

At present, California high school students must complete only two years of math to graduate from high school.<sup>2</sup> However, the California State University (CSU) and University of California (UC) systems require three years (and recommend four years) of high school mathematics, including geometry and advanced algebra, for admission.<sup>3</sup> Recently, CSU considered revising admission criteria to formally require students to complete an additional year of quantitative reasoning courses in high school. Although the proposal was not approved, it spurred efforts to increase math courses taken by high school seniors throughout the state. Expanding math course-taking is also one of the goals of the diversified math pathways included in the proposed revisions to the *Mathematics Framework for California Public Schools: Kindergarten Through Grade 12*, which is expected to be adopted by the State Board of Education in 2023.<sup>4</sup>

### Data and Methods

Statistics were calculated using course-level data from the California State Achievement Data System (CASA) 12th-grade math is course-taking data for students participating in the Statewide Balanced Assessment System (SBAS) data are linked to student data from the National Student Longitudinal Study (NSLS) to explore the relationship between high school and postsecondary enrollment. Data from the UC Office of the President (UCOP) categorization of new courses offered in high schools are included in 12th graders' course-taking data from the most recent cohort of the pandemic-derived SBAC in 2017–18. SBAS reports due to sampling error.

## Career Technical Education Among California High School Graduates

Audrey Boochever, Sherrie Reed, and Michal Kurlaender

Career Technical Education (CTE)—a structured series of courses that build students' technical and vocational skills, paving the way to postsecondary careers—is key to aligning secondary education with both labor market needs and opportunities.

CTE provides high school students with the chance to engage in practices that boost engagement and expanding students' exposure to and preparation for a variety of careers. CTE participation is linked to increased high school graduation likelihood of enrollment in two-year colleges,<sup>2</sup> and higher earnings.<sup>3</sup> With improved student outcomes, California has invested substantially in CTE in recent years (See "Recent Policy and Funding Efforts to Improve Career Education"). CTE is generally linked to better educational and earnings outcomes across student subgroups<sup>4</sup> and industry sectors.<sup>5</sup>

CTE in California's high schools is organized around 15 industry sectors: Agriculture & Natural Resources; Health Science & Medical Technology; and Manufacturing & Development (see page 5 for a complete list of industry sectors). Within each sector, there are a number of pathways—a sequence of two or three courses, with a capstone course—that a student may choose to complete. For instance, in the Business, Agriscience, Animal Science, Ornamental Horticulture, Plant Science pathways all fall under the Agriculture & Natural Resources industry sector. There were 57 pathways among the 15 industry sectors. To complete a CTE pathway, a student must earn a grade of C– or better in the pathway's capstone course.

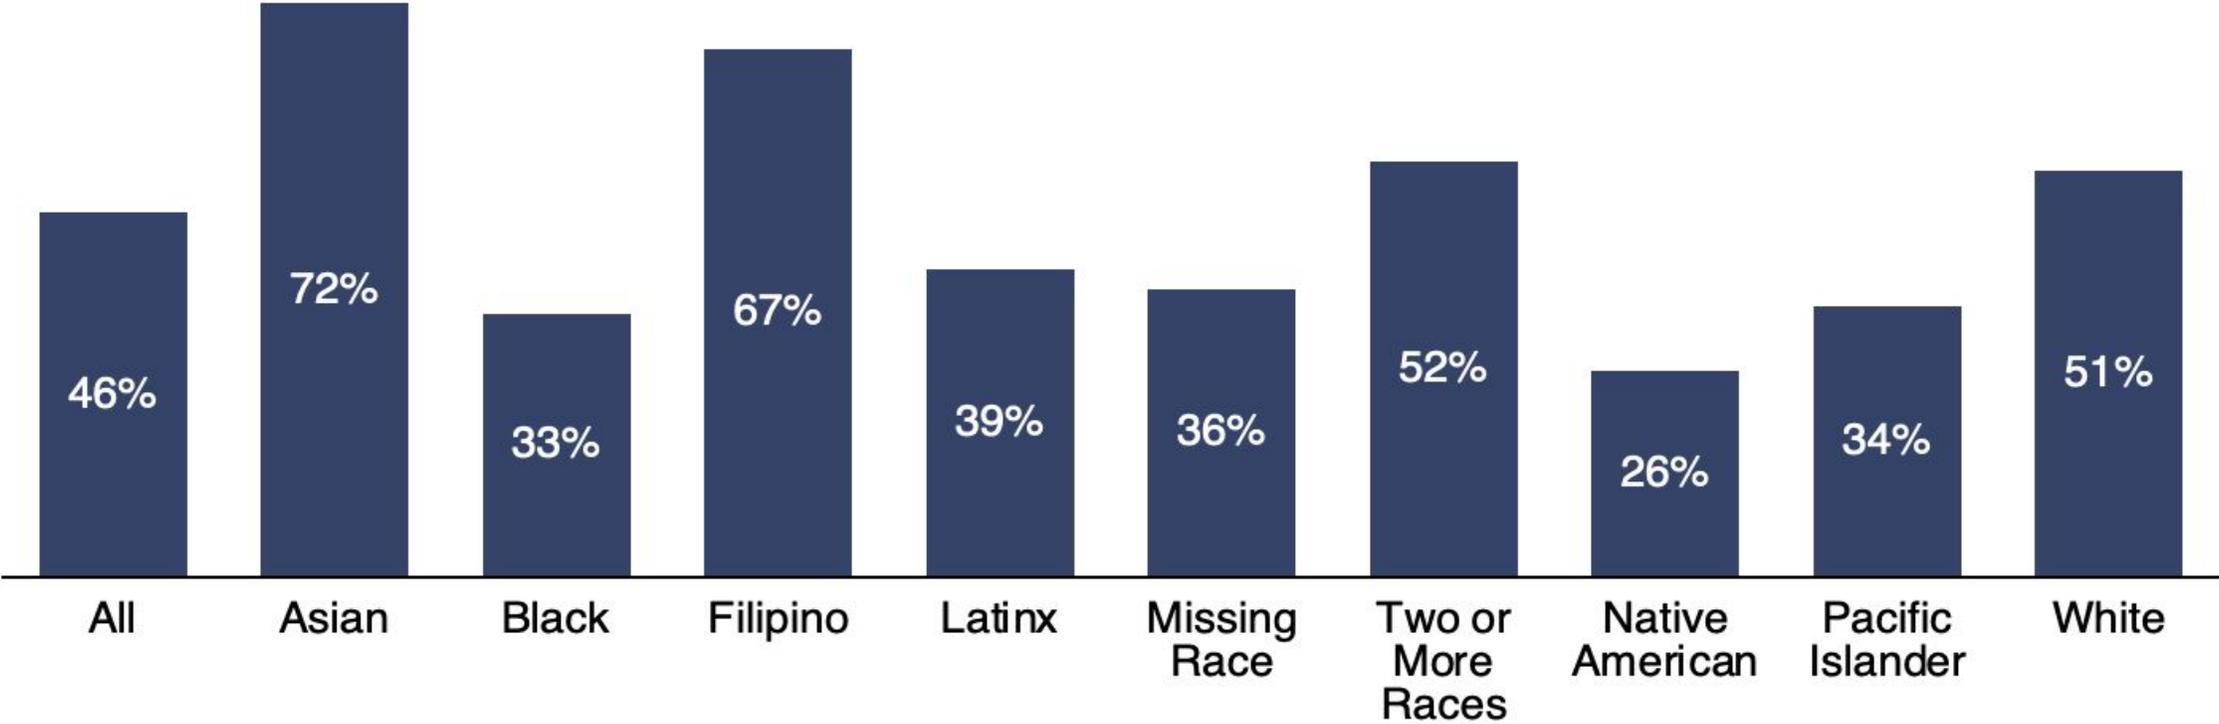

# A Strong Start for College and Career: Dual Enrollment Participation from 9th to 12th Grade

**Forthcoming February 2024**

# CSAC

# Students voice their concerns about college

*“I’m worried about the **financial challenges** I’ll face. I’ll need to think about **food, working, and managing my time and money**. It’s a lot. I’ll be overwhelmed at first and won’t be sure about anything. I’ll need to worry about multiple things, not just my education or grades.”*

- High school senior, 2023

*“I believe remaining consistent [with] my academics will [be] the biggest challenge. I personally don’t believe I’m prepared to pass college level classes. Yet I notice ... Most of [the] class of 2023, aren’t prepared as well.”*

- High school senior, 2023

*“I think the biggest challenge I’ll face in college is **balancing family obligations and studying**. Since freshman year in high school, I’ve been the primary caretaker of my nephew. Money has always been tight so we haven’t had the means of finding a daycare service... I’m planning to go home every other weekend to help out with child care, help my mom with her job, and go to Mexico to help my uncles with their business. I know it’s going to be difficult to find a balance but it’s a fact of my life that is non-negotiable and I will have to find a way to work through this.”*

- High school senior, 2023

*“I am excited to explore student life as independently as I can. I want to really feel what it may be like to be an active student on the go, or even on the slow. I am excited to achieve academic heights and experience a school life where I have the choice to control certain variables like class and schedule, and work to better understand and establish my own work ethic. Most of all I am excited to make the most of my college experience, meet new people, and learn from new perspectives.”*

- High school senior, 2023

# Thank you!

VAL VERDE UNIFIED SCHOOL DISTRICT ANNOUNCES

## ETHNIC STUDIES

A partnership with UCR

### ETHNIC STUDIES EDUCATION SPECIALIZED CERTIFICATE

EST. Tuition  
**\$1,365**

Learning Format  
**ONLINE**

Duration  
**3 months\***

\*Duration times can vary, talk to your student success coach for more information.

Total Units  
**8 Units**

#### Specialized Study Certificate in Ethnic Studies Education

Make Your Classroom a Catalyst for Social Justice

**What You'll Learn**

- Introduction to race and ethnicity concepts and theories
- Concepts in racial, class, and gender inequalities within a K-12 context
- Introduction to pedagogies of ethnic studies for a K-12 environment
- Practical applications in a K-12 environment
- Racism and racial justice
- Pedagogy around the contradictions of knowledge and power in educational institutions and related academic research and practical applications

**Who Should Enroll in This Certificate**  
Positions might include:

- Pre-service teacher education candidates
- Pre-service teacher candidates enrolled in the GSCE Teacher Education Program – Ethnic Studies Pathway
- In-service P-12 educators
- Education administrators
- Civic and community leaders

**All VVUSD Ethnic Studies teachers who participate can be reimbursed the cost of tuition OR use the credits for SALARY advancement .**

<https://extension.ucr.edu/certificates/ethnicstudieseducation>

**For Reimbursement turn in the following to Ed Services:**

1. Complete a Expense Reimbursement Form
2. Submit Tuition Receipts
3. Submit Transcript verifying passing grade

\*Note: If the teacher wishes to use the units toward salary advancement, they cannot be reimbursed for the class.

A photograph of a large group of graduates at a ceremony. They are wearing blue caps and gowns. Some are wearing red stoles. The graduates are looking towards the right side of the frame. The background is slightly blurred, showing more graduates and some lights.

## Val Verde Unified School District

When the Val Verde Unified School District found that not all low-income students were completing and submitting financial aid applications, it made financial aid application completion a graduation requirement in 2017.

# Val Verde Unified School District Member Roles

# CELEBRATE SUCCESS

### STEAM Discovery

Students use engineering design principles to solve problems using introductory coding, math, science and technology

TOOLS: LEGO, Sphero, Ozobots, block coding, iPads, green screen

### STEAM Immersion

Students use engineering design principles to solve increasingly more complex problems using coding, science, math and technology

TOOLS: LEGO, Scratch Jr, TinkerCad, iPads, Soundtrap, 3D printer, green screen

### STEAM Application

Students apply knowledge of science, math and engineering to solve complex problems using industry recommended equipment

TOOLS: LEGO, Scratch, Soundtrap, photography, CNC machine, 3D printer, Solidworks CAD Design, laser engraver

### STEAM Career and Entrepreneurship

Students use industry specific skills and equipment to earn industry certifications; students use STEAM principles to create entrepreneurial opportunities

TOOLS: Guided by input from local industry partners

CREATIVITY, COLLABORATION, CRITICAL THINKING, COMMUNICATION, & FLEXIBILITY

Education Incentive Grant

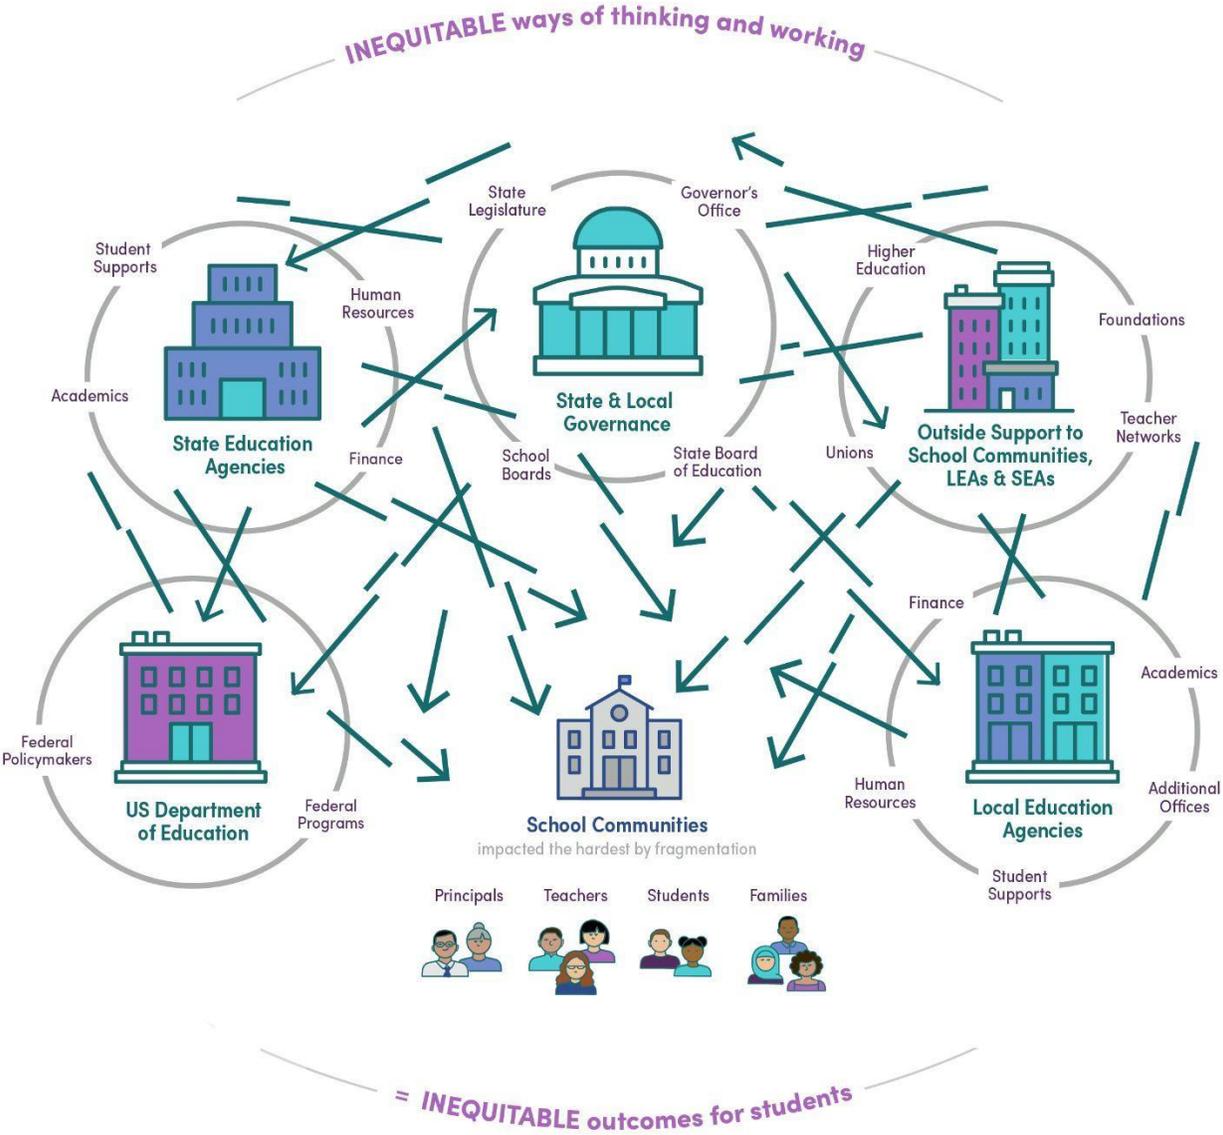

Foster Youth Services  
Coordinating Programs  
(FYSCPs)

**However, equitable and coherent implementation of state-funded programs and initiatives has always been a challenge for education leaders in California.**

**Fragmentation within districts and lack of alignment of resources to a strategic vision furthers programmatic incoherence and initiative fatigue.**

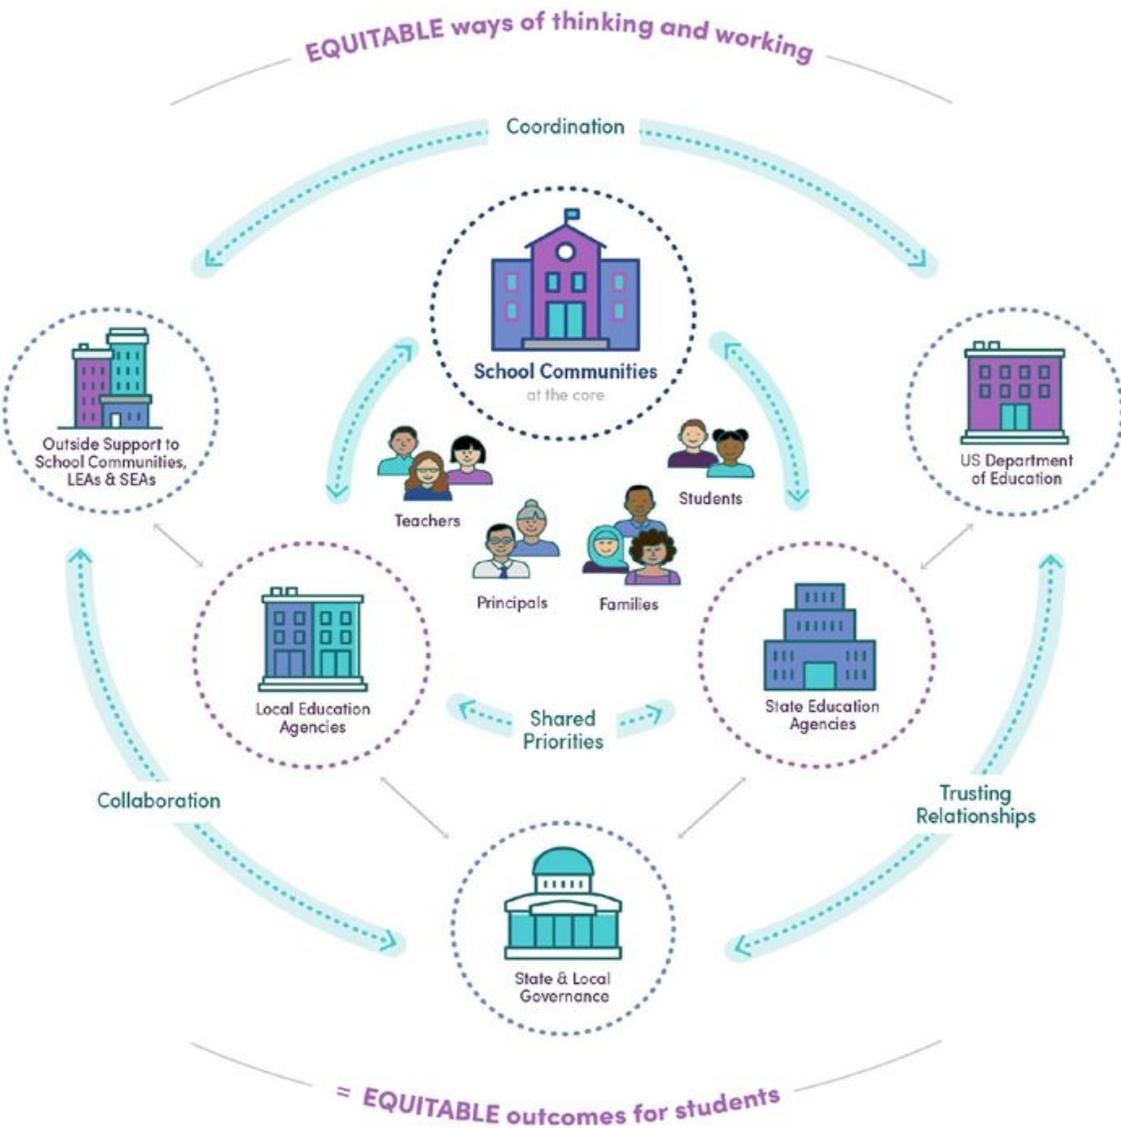

# The state of the state today: *fragmentation and chaos*

**With this challenge comes an opportunity to improve the way we do things.**

# Vision for the future: *from chaos to coherence*

# The Coherence Lab equips district and state leaders with the tools and knowledge to redesign incoherent and inequitable school systems

**Coherence is a mindset and approach** that consciously addresses silos and bias in public education and aligns around shared priorities.

Coherence is an **organization-wide and system-wide perspective to identify problems and solutions**, prioritize collaboration and communication among stakeholders, and build an intentional focus on equity into processes and decisions.

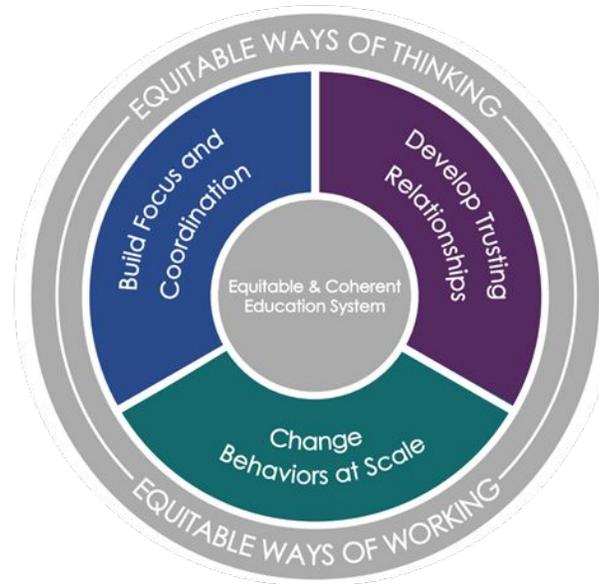

# The Coherence Framework has 4 elements that address the root causes of fragmentation

## Cultivate trusting relationships:

Engage authentically, support inclusion and address power dynamics within and across your organization, with stakeholders and with people closest to the problems

## Build focus and coordination:

Prioritize what's most important from a sea of needs, collaborate effectively across and within organizations, and remove obstacles that get in the way

## Change behaviors at scale:

Identify change agents, connect mindsets and beliefs to concrete behaviors, and set clear and specific expectations about critical moves

## Equitable ways of thinking and working:

Reflect on individual identity, address bias and commit to design for people closest to the problem to accomplish change for all people. Deeply understand the root causes of problems to solve and, and explore, test and scale solutions that meet the needs of people closest to the problems

# Building coherence mindsets and approaches is fundamentally a change management initiative

- People don't see the need to change
- “We've never done it like that before” mentality
- People get bogged down in analysis
- People are unable to overcome old patterns of behavior
- People are unmotivated to change
- “I'll change tomorrow” mindset
- “It'll never work” mindset
- “I know what I should do but I'm not doing it” mindset
- “My people hate change” mindset
- People are excited but lose momentum
- “It's just too much” mindset
- Everyone agrees with change but nothing is happening

# Education First recently conducted an analysis of the historical and current landscape of high school transformation in California that surfaced several lessons for improving coherence

## Lessons for Coherence

**Unify stakeholders for a shared vision:** Conflicting policies and misaligned expectations cause confusion and hinder progress. Cultivate collaboration and communication across educators, administrators, and policymakers to develop a clear, shared vision for education. This vision should guide all initiatives and ensure everyone works towards the same goals.

**Align initiatives with shared vision:** Initiatives without a shared vision lead to inconsistent implementation across schools and districts, creating a fragmented landscape and hindering a unified vision for public education. There needs to be a clear, overarching vision that guides all initiatives and ensures initiatives are strategically aligned.

**Bridge the data divide:** Fragmented systems and inconsistent data collection create blind spots and hamper progress. Invest in robust data infrastructure that ensures accurate, accessible data across the system. Develop data-driven decision-making processes to track progress, identify areas for improvement, and seamlessly integrate new initiatives.

**Build capacity for coherence:** Limited organizational capacity and inconsistent funding undermine coherent implementation. Empower schools and districts with resources and training to manage data, adapt to new initiatives, and make informed decisions. Secure consistent funding streams to avoid disruptions and support long-term transformation efforts.

I look forward to Table Talk and Q&A with you today! To learn even more about the Coherence Lab in the future, check out [coherencehub.org](http://coherencehub.org) and reach out to me directly to chat
